

## Flexible PVC-P Standard Series Extrusion

MITSUBISHI CHEMICAL PERFORMANCE POLYMERS PVC compound range incorporates a wide range of PVC-P and PVC-U. PVC-P range includes 2 trade names, SUNPRENE™ and VINIKA™

- SUNPRENE™ formulations offer high mechanical properties, which are specifically designed for very demanding applications such as speciality cable insulation and window seals.
- VINIKA™ rigid and flexible formulations provide a customized combination of properties such as ageing, impact, gloss and colour for a wide variety of applications.

EXTRUSION SERIES				
Transparent		Opaque		NBR
Series	STANDARD			
	VE 162	VE 182	VE 183	VE 115
Shade	Transparent	All colours	Dark colours cost effective	Dark colours
Series	PHTHALATE FREE			
	VE 108	VE 148	VE 149	VE 127
Shade	Transparent	All colours	Dark colours Cost effective	Dark colours
Hardness	55 Shore A to 40 Shore D			
	HIGH PERFORMANCE TYPES ON REQUEST			

Depending on the end application, formulations comply with the main international standards and have been certified by independent approval organisations such as CSTB, LNE, SKZ, BSI, LCIE, LRCCP, etc.

We undertake research specifically focused upon environmental protection, paying particular attention to develop products in accordance with the RoHS directive, the REACH regulation.

## ABOUT US

The Mitsubishi Chemical Performance Polymers business (MCP) is one of the top growing businesses at Mitsubishi Chemical Group. MCP delivers innovative solutions based on our chemistry technology platforms, with expertise in polymer design, and thermoplastic compounding, to offer tailor made solutions.

## CUSTOMER ORIENTED

Our commitment is to be your global specialty partner by developing and delivering solutions which satisfy a variety of needs.

## GLOBAL

Worldwide, we deliver high quality, thermoplastic resins for automotive applications. These applications include safety parts, seals, under the hood, interior and exterior components. As a reliable partner, we also provide global thermoplastic solutions for consumer goods, packaging, medical, building industries, wire and cable, and other industrial applications.
